EMERGENCY OVERVIEW:

ROUTES OF ENTRY: Skin, Eye, Inhalation, Ingestion

POTENTIAL HEALTH EFFECTS

EYES: Liquid may cause eyes to become irritated, prolonged exposure to skin may cause drying and cracking.
SKIN: Prolonged absorption of material through skin could cause damage to blood, kidneys, and nervous system.
INGESTION: Headache, Lethargy, drowsiness, weakness, difficulty walking, personality change, poor appetite, nausea, and weight loss.
INHALATION: Headache, Lethargy, drowsiness, weakness, difficulty walking, personality change, poor appetite, nausea, and weight loss. Prolonged exposure to vapors in concentrations excess of TLV can cause damage to kidneys, blood and nervous system.

ACUTE AND CHRONIC HEALTH HAZARDS: Vapor irritation to eyes, nose, throat. Liquid irritating to eyes and skin. Prolonged and repeated exposure to vapor concentrations in excess of TLV or through prolonged absorption through the skin may cause damage to blood, kidneys, and nervous system.

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE: Medical conditions generally aggravated by exposure.

SECTION 3 NOTES:
SECTION 4: FIRST AID MEASURES

EYES: Immediately flush with plenty of fresh water. Remove contaminated shoes and clothing. Get medical attention.

SKIN: Immediately flush with plenty of fresh water. Remove contaminated shoes and clothing. Get medical attention.

INGESTION: Do NOT induce vomiting unless directed to do so by medical personnel. Get immediate medical attention.

INHALATION: Remove victim to fresh air. If not breathing, give artificial respiration. Give oxygen if breathing is difficult. Get professional medical attention immediately.

EXTINGUISHING MEDIA: Foam, Alcohol Foam, Carbon Dioxide, Dry Chemical, Water Fog
SPECIAL FIRE FIGHTING PROCEDURES: Keep containers in storage, Cool with water to prevent pressure build up and bursting. Self contained breathing apparatus should be worn to protect firefighters from toxic degradation products.
UNUSUAL FIRE AND EXPLOSION HAZARDS: Dry nitrocellulose (Cellulose Nitrate) resin is extremely flammable and burns quickly. Avoid friction and impact to any quantity of dry resin. Burning rate increases with quantity and confinement.
HAZARDOUS DECOMPOSITION PRODUCTS: Normal products of combustion (carbon monoxide and carbon dioxide)

SECTION 5 NOTES:
Product contains Ethyl Ether: EXTREMELY FLAMMABLE

SECTION 6: ACCIDENTAL RELEASE MEASURES

ACCIDENTAL RELEASE MEASURES:
Immediately eliminate all possible sources of ignition. Use an appropriate absorbent. Large spills may be flushed into a suitable confinement with water. Do not use ferrous (iron) tools to scrape material from floor or other surfaces.

SECTION 7: HANDLING AND STORAGE

HANDLING AND STORAGE: Use non-sparking tools. Ground all containers before transferring material. Keep containers tightly closed, cool, dry, and away from sources of heat, sparks, and ignition. Dry nitrocellulose is extremely flammable. Avoid accumulating large quantities of dry resin. Dry resin may ignite from sparks, flame, or friction impact. Use with adequate ventilation.

OTHER PRECAUTIONS:

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Mechanical or supplemental local exhaust may be required to keep vapor concentrations below TLV.
VENTILATION: Mechanical or supplemental local exhaust may be required to keep vapor concentrations below TLV
RESPIRATORY PROTECTION: Use NIOSH approved cartridge respirator for vapor concentrations above time weighted average (TLV).
EYE PROTECTION: Face shield or goggles required. Eye wash and safety shower in the working area are recommended.
SKIN PROTECTION: Chemical resistant gloves and apron are recommended.
